

D-Verb

Reverb/Ambience Plug-In for Pro Tools

M | W
Mac OS | Windows

FEATURES

- Professional-quality, 24-bit reverb/ ambience processing with TDM, RTAS and AudioSuite functionality
- 7 algorithm presets
- Easy-to-use intuitive software interface
- Cost effective — run multiple reverbs simultaneously
- Automation features including dynamic TDM plug-in automation
- Save, copy, and paste settings
- Compatible with Pro Tools systems running on Mac OS or Windows

From spacious halls to intimate rooms, D-Verb™ brings professional-quality reverb or ambience processing to single or multiple tracks of your Pro Tools® session. With any TDM-based Pro Tools system, D-Verb delivers real-time processing with automation of every parameter. D-Verb also supports AudioSuite™ file-based processing, for use with any Pro Tools system.

D-Verb can be run on single or multiple tracks, auxiliary inputs, and group masters, in mono, stereo, or “mono-to-stereo” to create a stereo image from a mono track. With an attractive new interface, easy on-screen editing, superb audio quality, and the ability to do the work of multiple stand-alone reverb processors, D-Verb is both a great performer and a great value.

AMAZING SOUND QUALITY AND CREATIVE CONTROL

D-Verb offers a number of benefits to all Pro Tools owners, including:

- An all-digital, low-noise signal path that keeps your audio in the digital domain from start-to-finish.
- High-quality, 24-bit reverberation and ambience processing — everything you need in reverb processing at a more affordable price than stand-alone units of similar quality.

- 7 algorithm presets (including Hall, Church, Plate, Room 1, Room 2, Ambience, Non-Linear) with adjustable parameters for size, pre-delay, decay time, diffusion, and more. Select the effect you need — from massive halls to intimate rooms to your own customized special effects.
- Easy updating — Software updates make it easy to add the latest features and functionality. Save, copy, paste, and recall settings using the plug-ins librarian and settings pop-up menus. All parameter settings are stored with your Pro Tools session for instant recall. Easy expandability — DSP power, available on-demand from DSP Farm, MIX Core/Farm, and HD Core/Process cards, lets you use D-Verb several times simultaneously. Get multiple reverbs for the price of one software plug-in.

THE CHOICE OF PROFESSIONALS WORLDWIDE

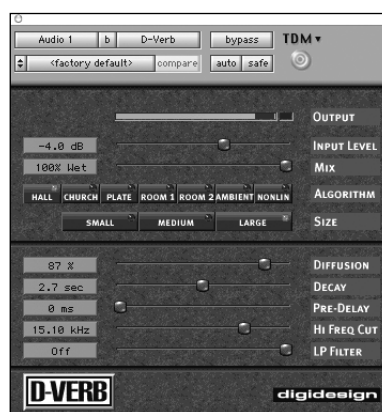

D-Verb is just one of several great-sounding plug-ins from Digidesign, the world’s leading manufacturer of digital audio workstations for the professional music, film, broadcast, and multi-media markets. Whether you’re looking for EQ, mastering tools, pitch processing, or retro-sounding effects, Digidesign makes a plug-in to meet your needs. Because we realize that what type of processing you use depends a lot on personal choice, you can also choose from more than 100 plug-ins from Digidesign Development Partners, including all the best names in audio.
