

Read Me

DV Toolkit 2

This Read Me documents important information and known issues for using DV Toolkit 2 with Pro Tools LE 8.0. When available, workarounds are provided.

Compatibility

For the latest compatibility information, visit the Digidesign website (<http://www.digidesign.com/compatibility>).

Installation and Operation

For software installation and operating instructions, refer to the electronic PDF *DV Toolkit 2 Guide* that came with your software. For additional information about Pro Tools, refer to the *Pro Tools Reference Guide*.

Copy Protection

Many Digidesign plug-ins and software options are authorized using the iLok USB Smart Key (iLok), manufactured by PACE Anti-Piracy, Inc.

iLok USB Smart Key

The iLok is similar to a dongle, but unlike a dongle, it is designed to securely authorize multiple software applications from a variety of software developers. This key can hold over 100 licenses for all of your iLok-enabled software. Once an iLok is authorized for a given piece of software, you can use the iLok to authorize that software on any computer.

See the *iLok Usage Guide* for details, or visit the iLok website (www.iLok.com).

⚠ *The iLok USB Smart Key is not supplied with your plug-in or software option. You can use the one included with certain Pro Tools systems (such as Pro Tools|HD-series systems), or purchase one separately.*

Known Issues

This section documents known issues you may encounter in using DV Toolkit 2, along with workarounds if they exist.

Scrub Trim Tool Does Not Scrub Audio When Trimming Looped Regions (Item #72650)

If you use the Scrub Trim tool to enable the Loop Trimmer to trim a looped region, the audio will not be scrubbed.

Unable to Maintain Original Time Code Locations (Item #37628)

When redefining time code, Pro Tools may incorrectly report that it is “unable to maintain original time code locations with the entered start time because a region or an alternate playlist would exist outside the session boundaries. Click OK to maintain relative time code.” If you click OK, the time code will be remapped properly.

DigiTranslator 2.0.1

The following sections document known issues you may encounter in using DigiTranslator 2.0.1, along with workarounds if they exist. DigiTranslator 2.0.1 is included with DV Toolkit 2.

Exporting OMF Files from Pro Tools into Projects with Higher Sample Rates (Item #27337)

If you export an OMF file from Pro Tools using sample rate conversion and import it into a project with a higher sample rate (for example, from a Pro Tools session at 44.1 kHz to a Media Composer project at 48 kHz), clicks will appear in the audio at region separation points and at the beginning of fade outs and end of fade ins (but not in crossfades). To avoid this problem, export the OMF file from a Pro Tools session with the same sample rate as the destination project.

Pro Tools Unable to Relink to SD II when Importing OMFI (Item #35981)

If you are importing OMFI files into Pro Tools, and the OMFI sequence was exported from an Avid Media Composer with Sound Designer II files (SD II), you must choose to Relink by Unique ID and Duration the first time you import or open the OMFI sequence in order to successfully relink to the SD II files. For optimal compatibility, always use AIFC or .WAV for transferring sequences and media between Avid and Pro Tools.

Rendered Audio Effects Are Not Exported from Avid Xpress DV v3.5 for Windows XP (Item #28907)

Rendered audio effects such as equalization are not exported from an Avid Xpress DV 3.5 for Windows if the OMF export is audio only. If the OMF export includes video, the rendered audio effects will be exported as well.

Known Issues for Specific Plug-ins

The following sections document known issues you may encounter in using specific plug-ins included with Complete Production Toolkit, along with workarounds if they exist.

TL Space Native

Unable to Dismiss Reset Dialog from Control Surface (Item #51558)

When using TL Space with a control surface, after clicking Reset in TL Space the dialog is posted: "Are you sure you want to reset? All parameters will be reset to default values." This dialog cannot be dismissed by pressing the Escape button on your control surface. The Escape button does not flash when the dialog is open.

The IR Menu or Directory Does Not Open when Selected (Item #72227)

This condition occurs when both TL Space TDM and TL Space Native are installed. You may only have one of these products installed at one time. If you are using Pro Tools HD, you should only have TL Space TDM installed. (TL Space TDM includes RTAS versions.) If you are using Pro Tools LE or Pro Tools M-Powered, you should only have TL Space Native installed.
