

Hybrid Version 1.5.4 Update Release Notes

For owners of Hybrid version 1.5 on Windows

May 31, 2010

Who Should Use this Update?

This update is only for owners of version 1.5.x of Hybrid on Windows systems. It is not necessary for owners of Hybrid 1.6.

The Hybrid 1.5.4 update resolves an issue in the following area:

- Pro Tools hangs when scanning plug-ins if Internet Explorer 8 is installed

Required to Use This Update

The following must already be installed on your system in your Plug-ins folder:

- Hybrid version 1.5.x.

To view whether you have version 1.5.x of Hybrid installed:

1. Go to C:\Program Files\Common Files\Digidesign\DAE\Plug-Ins
2. Right-click on the plug-in “Hybrid.dpm”
3. Select Properties, then Details
4. File version should begin with “1.5”

Installation Instructions

To update to Hybrid version 1.5.4.10580

1. Verify Hybrid version 1.5 is installed on your system.
2. Quit the Pro Tools application if it is open.
3. Locate the Hybrid Updater and launch it.
4. Follow the onscreen instructions.
