

MC Pro / S5-MC 3.5 Release Notes

Version: 3.5 October 2016

This release includes bug fixes and performance enhancements and now supports PT12.

Important!

The EUCON performance improvements included in v3.5 make v3.5 and later versions incompatible with all previous versions of S6, EUCON and EuControl. As a result, version 3.5 and future versions must not be run on the same network (subnet) as *any* previous S6, EUCON or EuControl Surface software. All devices on the network must be running the same version of S6 EUCON and EuControl. Please uninstall or remove from the same network all previous S6, System 5 Hybrid, S5-MC/MCPro, Pro Tools | Dock, Pro Tools | S3, and Artist Series software. Be sure to update EuControl, S6 and any other EUCON software to v3.5 or higher before using MCPro v3.5 or higher.

- To get the latest version of EuControl software for S3, Dock, and Artist Series, download them from your **Avid Account** or visit <http://www.avid.com/en/products/artist-control/learn-and-support>
- To get the latest version of S6 check your **Avid Account**
- Note: S5 Hybrid v3.5 software will be released later.

The following new installer files are included in this release:

EUCONMC_3.5.exe

- MCPro Software

EUCONWorkstation_3.5_Mac.dmg (Mac only)

- Workstation Software for Mac 10.9.5 and up including 10.11

EUCONWS_3.5_Win.exe (Win 7, 8.1 and 10 only)

- Workstation Software for Windows 7SP1 and up including Win 10

Note:

You must uninstall previous MCPro and Workstation software before installing this release. For Windows OS uninstall from the Control Panel, for Mac follow the instructions here:

http://avid.force.com/pkb/articles/How_To/Eucon-clean-Uninstall-for-Mac
