

Strike 1.0.1cs2 Update

Welcome to the Strike plug-in instrument for Pro Tools. This Read Me documents Strike 1.0.1cs2 update information. Please read it before installing the update.

What's Fixed in Strike 1.0.1cs2?

Strike 1.0.1cs2 contains the following fixes:

Strike synchronizes correctly to Pro Tools regardless of which Beat Sync setting is selected in the Config window and which version of Pro Tools 7.x is used. (Item #86021)

In the Style editor, selected Tools for editing are now displayed correctly. (Item #86020)

The Beat Sync setting is now set to Bar by default. (Item #86022)

Updating Strike

To update to Strike 1.0.1cs2 under Mac OS X:

- 1 Please make sure Strike 1.0 or higher is properly installed on your Pro Tools system.
- 2 Double click the downloaded DMG file to mount it.
- 3 Double click the Installer inside the mounted folder.
- 4 Follow the on-screen instructions.

To update to Strike 1.0.1cs2 under Windows XP:

- 1 Please make sure Strike 1.0 or higher is properly installed on your Pro Tools system.
- 2 Unpack the downloaded ZIP file by keeping its folder structure intact.
- 3 Double click the Installer inside the unpacked folder.
- 4 Follow the on-screen instructions.
