

Pro Tools HD 7.2cs1 for Windows XP

For Pro Tools|HD and Pro Tools|HD Accel Systems with Pro Tools HD 7.2 for Windows XP Only

Including Systems with AVoption|V10, Avid Mojo, and Media Station|PT 1.8.2

 This update will not work without Pro Tools HD 7.2 for Pro Tools|HD or Pro Tools|HD Accel systems on Windows XP already installed.

What's Fixed in Pro Tools HD 7.2cs1?

Pro Tools HD 7.2cs1 for Windows XP contains the following:

Fixed: Importing Files By Drag and Drop Could Prevent The Session From Being Saved (Item #80417)

MP3, MP4, WAV and AIFF were affected. A subsequent Save, Save As, Save A Copy or Auto-Backup would result in an assertion.

Fixed: DestructivePunch Recording Could Result in an Error (Item #81257)

DestructivePunch recording in Pro Tools 7.2 could result in the following error: "A fatal exception has occurred. Pro Tools must exit".

Fixed: Relink Problems When Using Mtools, Soundminer, or NetMix to Import Files (Item #81138)

Using "Automatically Copy on Import" created a duplicate file only when using Soundminer. Only the Pro Tools-created file (with an appended "2") was assigned a Unique ID. No Unique ID was being added to files imported by Mtools or Netmix. The relink problems would occur when re-opening the session.

Fixed: Slow Lock Times With DoReMi Video Decks With "Transport=Pro Tools" (Item #80818)

When using MachineControl in "Transport=Pro Tools" mode, the DoReMi video decks would take 3–5 seconds to synchronize, even if the pre-roll time was set lower.

Fixed: Occasional Crashing with Expansion|HD When Launching Pro Tools or While Working in a Session (Item #81941)

DAE errors -1140, -1141, -1146, -1151, -1156 and resultant crash could occur.

Fixed: Avid Video Clips Based on Still Images Could Be Truncated or Deleted when Opening Older Sessions (Item #82082)

A message "Some regions were truncated or removed from the region list or timeline because they refer to files which are too short" would appear. Clips would be deleted or truncated to a single frame if the session was created in Pro Tools 7.1x or earlier.

Who Should Use Pro Tools HD 7.2cs1?

This update is recommended for all Pro Tools HD 7.2 users and contains fixes in the following areas:

- Importing via drag and drop
- Recording with DestructivePunch
- Sessions with video clips
- Importing files using 3rd party applications
- Locking to non-linear decks such as DoReMi V1 when set to Transport = Pro Tools
- Expansion|HD
- Using Avid Video

⚠ *Pro Tools HD 7.2cs1 is provided as an interim “customer support (CS)” release to address the issues described. While our testing has not shown these changes to introduce other problems, this version has not been fully qualified by Digidesign.*

Updating Pro Tools

To update to Pro Tools HD 7.2cs1:

- 1 Verify Pro Tools HD 7.2 is installed on your Pro Tools|HD or Pro Tools|HD Accel system.
- 2 Quit the Pro Tools application if it is open.
- 3 Locate the Pro Tools HD 7.2cs1 installer and launch it.
- 4 Follow the onscreen instructions to install Pro Tools HD 7.2cs1.
- 5 When installation is complete, restart your computer.

This update installs the following files:

- ProTools.exe (v7.2cs1)
- DAE.dll (v7.2cs1)
- DSI.dll (v7.2cs1)
- ExpansionHD_Firmware.bin (v7.2cs1)
