

Pro Tools HD 7.3.1cs2 Update for Windows XP

March 8, 2007

For Pro Tools|HD & Pro Tools|HD Accel Systems with Pro Tools HD 7.3 or 7.3.1 Only

- This update will not work without Pro Tools HD 7.3 or 7.3.1 already installed
- *Please Note: If you are on 7.3, it is not necessary to update to 7.3.1 to use this update*

Who Should Use Pro Tools HD 7.3.1cs2?

This update is recommended for all Pro Tools HD 7.3 or 7.3.1 users. Pro Tools HD 7.3.1cs2 contains fixes in the following areas:

- DigiBase preview
- ICON

Plus fixes from 7.3.1cs1

- Sends
- Editing OMF Video clips

Plus these important fixes from Pro Tools HD 7.3.1, required to avoid potential data loss:

- Editing
- Bounce to QuickTime movie
- Memory Locations

Pro Tools HD 7.3.1cs2 is provided as an interim "customer support (CS)" release to address the issues described. While our testing has not shown these changes to introduce other problems, this version has not been fully qualified by Digidesign.

What's Fixed in Pro Tools HD 7.3.1cs2?

Pro Tools HD 7.3.1cs2 for Windows XP contains the following:

Fixed: Previewing Audio in the Workspace Could Cause an Assertion Error (Item #87627)

- This would occur if the previewed audio was the result of a search. Note that clicking on the waveform was not problematic.

Fixed: ICON Faders Can Become Offset From the Pro Tools Level (Item #87717)

- This could occur if the fader was moved without receiving a "touch on" and then touched properly.
- **Please Note:** After installing Pro Tools 7.3.1cs2, the user must un-declare, then re-declare the ICON main units and fader packs to prompt the firmware update dialog. If the ICON firmware is not updated, the fix will not be installed.

Fixes Included from Pro Tools HD 7.3.1cs1

Fixed: Adjusting Send Levels While Recording Audio Can Result in the Send Levels Resetting to "0" When Reopening The Session (Item #86186)

- This would occur if no automation had been written on the Send.

Fixed: Moving OMF Video Clips On The Timeline Could Result In an Access Violation Error Message (Item #85536)

- This would usually occur a number of drag and dropped OMF video clips from the Workspace were moved around on the timeline. The message was "Could not complete the Region Slide command because Access violation occurred".

Fixes Included from Pro Tools HD 7.3.1

Fixed: Launching Pro Tools Could Result in an Assertion (Item #85058)

- The assertion could be dismissed and Pro Tools would operate normally.

Fixed: Using the Smart Tool to Adjust Fades Would Eventually Result in an Access Violation and/or Display Anomalies (Item #85462)

Fixed: Intermittent Corruption After Saving, Closing, and Then Reopening a Session, Regions Were Missing or in the Wrong Location on the Timeline (Item #85755)

- As long as the session remained open, it would still playback correctly and with all playlists intact. The problem would not be observed until the session was closed and reopened.
- Any AutoBackup files created would have the same problem when subsequently opened.

Fixed: Bouncing to QuickTime Movie Could Produce a File Where Audio and Video Were Out of Sync (Item #85906)

- If the bounce duration exceeded the length of the video clip, the resulting movie would be stretched to fit the selection, resulting in a time-stretched picture.

Fixed: Performing "Undo Add Memory Location" or "Undo Edit Memory Location" Would Cause a Crash (Item #84814)

Updating Pro Tools

To update to Pro Tools HD 7.3.1cs2:

1. Verify Pro Tools HD 7.3 or 7.3.1 is installed on your system
2. Quit the Pro Tools application if it is open
3. Locate the Pro Tools HD 7.3.1cs2 installer and launch it
4. Follow the onscreen instructions to install Pro Tools HD 7.3.1cs2
5. When installation is complete, restart your computer

If you have installed previous updates, some file versions may not change. This update installs the following files:

- Pro Tools HD.exe (v7.3.1cs2)
- D-Command.dll (v7.3.1cs2)
- D-Control.dll (v7.3.1cs2)
- Firebob.dll (v7.3.1cs1)
- CFnd.dll (v7.3.1)
- DFW.dll (v.7.3.1)
