

Pro Tools LE 7.1cs7 Update for Mac OS X 10.4

For Digi 002, Digi 002 Rack, Mbox or Mbox 2 Systems with Pro Tools LE 7.1 for Mac OS X 10.4 (“Tiger”)

 *This update will not work without Pro Tools LE 7.1 for Digi 002, Digi 002 Rack, Mbox, or Mbox 2 systems on Mac OS X 10.4 already installed.*

What's Fixed in Pro Tools LE 7.1cs7?

Pro Tools LE 7.1cs7 for Mac OS X 10.4 contains the following:

Fixed: Using “Import Session Data” and Choosing “Consolidate From Source Media” Would Post an Error (Item #72604)

The error posted was "Could not complete your request because Assertion in Cmn_Interval.cpp, line 210."

Fixed: “Unexpected Quit” When Launched from a Non-Admin or Second Admin User Account (Item #75059)

The quit would occur after the Pro Tools icon bounced in the dock for a while.

Fixed: Problems When Launching in a Microsoft Active Directory Network User Configuration (Item #75908)

When using local storage the error posted was “Unable to Locate Digidesign Hardware.”

Fixed: Music Production Toolkit and DV Toolkit Would Not Work with Non-Admin Accounts (Item #75621)

The installer was not setting permissions correctly for the enabler files.

Note – Pro Tools LE 7.1cs7 is the second CS release for Pro Tools LE 7.1 (there were no cs1 through cs5 releases for version 7.1).

Fixes Includes from Pro Tools LE 7.1cs6

Fixed: Could Not Always Copy Time Code Values from Region Start/End/Length Fields (Item #72677)

Copying from these fields was not possible if there was a time selection on a playlist or the timeline. This could also potentially affect some third party post applications that required the use of these fields.

Please Note: All of the fixes in Pro Tools LE 7.0cs6 are also included in Pro Tools LE 7.1cs6.

Who Should Use Pro Tools LE 7.1cs7?

This update is recommended for Pro Tools LE 7.1 for Mac OS X 10.4 users requiring fixes in the following areas:

- Using “Import Session Data” with consolidation
- Non-admin or second Admin user accounts
- Microsoft Active Directory Network User Configurations
- Copying/pasting time code numbers

 *Important: Pro Tools LE 7.1cs7 is provided as an interim “customer support (CS)” release to address the issues described. While our testing has not shown these changes to introduce other problems, this version has not been fully qualified by Digidesign.*

Updating Pro Tools

To update to Pro Tools LE 7.1cs7:

- 1 Verify Pro Tools LE 7.1 for Mac OS X 10.4 is installed on your Digi 002, Digi 002 Rack, Mbox, or Mbox 2 system.
- 2 Quit the Pro Tools application if it is open.
- 3 Locate the Pro Tools LE 7.1cs7 installer and launch it.
- 4 Follow the on-screen instructions to install Pro Tools LE 7.1cs7.
- 5 When installation is complete, restart your computer.

If you have installed previous updates, some file versions may not change. This update installs the following files:

- Pro Tools LE (bundle) (v7.1cs7)
- DigiMachOServices.framework (v7.1cs7)
- FFmt.framework (installer change)
