

Pro Tools LE 8.0cs1 Update for Mac

January 19, 2009 — Read Me Document (Included with Download)

Please Note: The Pro Tools application will show version 8.0.0cs1 in "Get Info" after applying the 8.0cs1 update.

Only for Pro Tools LE Systems with Pro Tools LE 8.0 for Mac OS X

- This update requires previous installation of Pro Tools LE 8.0 software
- Universal installer for PowerPC and Intel-based Macs

Who Should Use Pro Tools LE 8.0cs1?

Pro Tools LE 8.0cs1 for Mac OS X contains fixes and changes in the following areas:

- Session/File management
- File management
- Mixing
- Satellite protocol communication (Video Satellite LE systems only)

Pro Tools LE 8.0cs1 is provided as an interim "customer support (CS)" release to address the issues described. While our testing has not shown these changes to introduce other problems, the fixes described have not been fully qualified by Digidesign.

What's Included in Pro Tools LE 8.0cs1 for Mac OS X?

Fixed: Converting Sample Rate During Save Copy In or Import Session Data Adversely Affects Volume Automation (Item #111930)

- Saving a session copy with sample rate conversion to a rate different from the session's may result in erroneous automation ramps between breakpoints. This is mostly evident in scenarios where a static automation level had been changed over the duration of a single region.

Fixed: Crash When Removing Files that are also used in Transfuser (Item #107710)

- Removing a file from the Pro Tools region list or project browser may crash Pro Tools if another audio file with the same name is already used by Transfuser.

Fixed: Channel width changes may remove downstream mono plug-ins and related automation without warning. (Item #112589)

- Changing the channel width by inserting a mono-to-stereo plug-in to a mono track will remove a downstream mono plug-in (and all its automation data) that resides on underlying insert slots without warning.

Fixed: Satellite Protocol Communication Issues

- This fix is recommended for all users of Video Satellite LE
- When using Pro Tools 8.0cs1 or higher with Video Satellite LE, all connected satellite systems must be running Pro Tools 8.0cs1 or higher.
- Pro Tools 8.0 cannot be connected as a satellite to other systems running Pro Tools 8.0cs1 or higher.

Installation Instructions

Pro Tools LE 8.0cs1

To update to Pro Tools LE 8.0cs1:

1. Verify Pro Tools LE 8.0 is installed on your system.
2. Quit the Pro Tools application if it is open.
3. Locate the Pro Tools LE 8.0cs1 update installer and launch it.
4. Follow the onscreen instructions to install Pro Tools LE 8.0cs1.
5. When installation is complete, restart your computer.

Pro Tools LE 8.0cs1 will update the following file to the version listed (use Get Info to view file version):

- Pro Tools LE.app (v8.0.0cs1)*

**This should have been listed as version "8.0cs1", but was inadvertently listed as "8.0.0cs1".*

Video Satellite LE 8.0cs1

If you own Video Satellite LE, *you should also download the separate installer* for this option for installation on the Pro Tools LE video satellite system:

- Video Satellite LE 8.0cs1 (Mac)
