

Pro Tools M-Powered 7.1cs8 Update for Mac OS X 10.4

For Qualified M-Audio Devices with Pro Tools M-Powered 7.1 for Mac OS X 10.4 (“Tiger”)

 *This update will not work without Pro Tools M-Powered 7.1 for qualified M-Audio devices on Mac OS X 10.4 already installed.*

What's Fixed in Pro Tools M-Powered 7.1cs8?

Pro Tools M-Powered 7.1cs8 for Mac OS X 10.4 contains the following:

Fixed: Some International Characters Were Not Allowed In Pro Tools 7 Sessions (Item # 71269 and 76222)

German, Norwegian, Swedish, and French/French Canadian characters were affected.

DigiBase search criteria was also affected.

Fixes Included from Pro Tools M-Powered 7.1cs7:

Fixed: Using “Import Session Data” and Choosing “Consolidate From Source Media” Would Post an Error (Item #72604)

The error posted was “Could not complete your request because Assertion in Cmn_Interval.cpp, line 210.”

Fixed: “Unexpected Quit” When Launched from a Non-Admin or Second Admin User Account (Item #75059)

The quit would occur after the Pro Tools icon bounced in the dock for a while.

Fixed: Problems When Launching in a Microsoft Active Directory Network User Configuration (Item #75908)

When using local storage the error posted was “Unable to Locate Digidesign Hardware.”

Fixed: Music Production Toolkit Would Not Work with Non-Admin Accounts (Item #75621)

The installer was not setting permissions correctly for the enabler files.

See “Additional Download for Optional Music Production Toolkit Owners” below for Music Production Toolkit cs7 installer.

 *Pro Tools M-Powered 7.1cs7 is the first CS release for Pro Tools M-Powered 7.1 (there were no cs1 through cs6 releases for M-Powered version 7.1).*

Who Should Use Pro Tools M-Powered 7.1cs8?

This update is recommended for Pro Tools M-Powered 7.1 for Mac OS X 10.4 users and contains fixes in the following areas:

- Using international characters
- Using “Import Session Data” with consolidation
- Non-admin or second Admin user accounts
- Microsoft Active Directory Network User Configurations

⚠ Important: *Pro Tools M-Powered 7.1cs8 is provided as an interim “customer support (CS)” release to address the issues described. While our testing has not shown these changes to introduce other problems, this version has not been fully qualified by Digidesign.*

Updating Pro Tools

To update to Pro Tools M-Powered 7.1cs8:

- 1 Verify Pro Tools M-Powered 7.1 for Mac OS X 10.4 is installed on your M-Audio system.
- 2 Quit the Pro Tools M-Powered application if it is open.
- 3 Locate the Pro Tools M-Powered 7.1cs8 installer and launch it.
- 4 Follow the on-screen instructions to install Pro Tools M-Powered 7.1cs8.
- 5 When installation is complete, restart your computer.

This update installs the following files:

- Pro Tools M-Powered (bundle) (v7.1cs8)
- DigiMachOServices.framework (v7.1cs8)
- FFmt.framework (installer change)

Additional Download for Optional Music Production Toolkit Owners

Not Included With Pro Tools M-Powered 7.1cs7 or 7.1cs8 Downloads

The Music Production Toolkit cs7 installer fixes the following problem encountered with the original installer:

Music Production Toolkit Would Not Work with Non-Admin Accounts (Item #75621)

- The installer was not setting permissions correctly for the enabler files.
- This installer requires that you have Pro Tools M-Powered 7.1cs7 installed.

If you have already installed the Music Production Toolkit successfully on your Mac admin account, there is no need to download the cs7 installer. There are no changes to the actual software, only the installer behavior. The Music Production Toolkit file in your Digidesign/Pro Tools folder remains at version 7.1:

- MusicProductionToolkit.bundle
