#### **Fixed: Improved horizontal scrolling with track balls and Apple Mighty Mouse (Item #119003)**

- Optimized scrolling speed and performance with track balls and Apple Mighty Mouse. The scroll speed is now more consistent with using the right/left arrow buttons in Pro Tools.
- Users should *also* install the latest drivers for their input device (from Apple, Logitech, Kensington, etc.)

#### **Fixed: Exiting the Start/End/Length fields using "/" (the forward slash key from the numeric keypad) caused the entered value to be ignored (Item #118727)**

- Resolved an issue in which using the "/" key (forward slash key from the numeric keypad) to exit the Start/End/Length fields after entering a value would cause the entered value to be ignored. This broke the workflow with several 3rd party conform applications.
