

Structure 1.0.1 Update (For Structure 1.0 Only)

Welcome to the Structure plug-in instrument for Pro Tools. This Read Me documents changes and known issues for the Structure 1.0.1 update. Please read it before installing the update.

To make use of the Structure 1.0.1 update you have to own a Structure 1.0 license. You must also have the Structure Professional Sampler Workstation 1.0 installed on your system.

⚠ *This updater is for Structure only. It does not apply to Structure LE or Structure Free. The following fix is not an issue with these versions.*

What's New in Structure 1.0.1?

Structure 1.0.1 contains the following:

Faster Uploads of Samples Distributed Across Multiple Big Files

The Structure 1.0.1 update speeds up the loading of samples distributed across multiple big files. The perceived loading speed, especially with large or complex patches, is drastically minimized. This is particularly useful when working with Symphonic Orchestra Gold Complete—Structure Edition.

Known Issues

Error Message during Installation (Mac Only)

When running the Structure 1.0.1 updater for Mac, if you see the message “You cannot continue. There is nothing to install,” do the following:

- 1 Delete the file called Structure Setup.pkg located in the Hard Drive/Library/Receipts folder.
- 2 Run the Structure 1.0.1 updater again.
