- **Fixed: TL Space 7.x users on Pro Tools 7.x for Windows XP were not able to install additional Impulse Response files.**

Who Should Use TL Space 7.4cs1?

- This update is recommended for all TL Space and TL Space Native version 7.x owners on Windows XP experiencing problems importing IR files.

System Requirements

- iLok license for TL Space TDM Edition or TL Space Native Edition plug-in
- Pro Tools HD, Pro Tools LE, or Pro Tools M-Powered version 7.x software for Windows XP

Important: TL Space 7.4cs1 is provided as an interim "customer support" (CS) release to address the issue described. While our testing has not shown these changes introduce other problems, this version has not been fully qualified by Digidesign.
