Read Me

Satellite Link

This Read Me documents important information and known issues for using Satellite Link with Pro Tools HD 10.0. When available, workarounds are provided.

Compatibility

For the latest compatibility information, visit the Avid website (http://www.avid.com/compatibility).

Installation and Operation

For software installation and operating instructions, refer to the electronic PDF *Satellite Link Guide* that came with your software. For additional information about Pro Tools, see the *Pro Tools Reference Guide*.

Copy Protection

Many software plug-ins and software options are authorized using the iLok USB Smart Key (iLok), manufactured by PACE Anti-Piracy, Inc.

The iLok is similar to a dongle, but unlike a dongle, it is designed to securely authorize multiple software applications from a variety of software developers. This key can hold hundreds of licenses for all of your iLok-enabled software. Once an iLok is authorized for a given piece of software, you can use the iLok to authorize that software on any computer.

For more information, visit the iLok website (www.iLok.com).

Known Issues

This section documents known issues you may encounter in using Satellite Link, along with workarounds if they exist.

Linking Video Satellite and Satellite Link (Item #109199)

When trying to link to a the Media Composer system in a Satellite Link configuration with Video Satellite configuration, you cannot link from any Pro Tools Satellite system. You will need to link from the Media Composer or the Pro Tools administrator system.

Pro Tools and Media Composer Video Satellite Quit Unexpectedly when Disconnecting an Additional Pro Tools System During Playback (Item #110601 and UDevC00115566)

When multiple Pro Tools systems are connected via Satellite Link in conjunction with a Video Satellite, always stop playback before disconnecting any of the systems.
